

Workshop on EV Battery and Charging Technology

Organized under the IEEE IES HUBS & NODES Initiative
Hyderabad Hub, India

Overview

This two-day workshop focused on Electric Vehicle (EV) battery technologies, charging infrastructure, wireless charging, power electronics, and Vehicle-to-Grid (V2G) systems. The program brought together students, researchers, faculty members, and industry professionals to discuss emerging technologies and sustainable mobility solutions.

Event Details

Dates	January 5–6, 2026
Venue	Room No. 203, NAC–2, IIT Madras, India
Organized By	Department of Engineering Design, IIT Madras
In Association With	IEEE Industrial Electronics Society (IES) – HUBS & NODES Initiative

Topics Covered

- EV Battery Technologies
- Battery Management Systems (BMS)
- Charging Infrastructure and Fast Charging
- Wireless Charging Technology
- Vehicle-to-Grid (V2G) Systems
- Power Electronics for EV Applications
- Sustainable Mobility and Energy Systems

Resource Persons & Distinguished Speakers

- Dr. Gautham Ram Chandra Mouli – TU Delft, Netherlands
- Dr. Vishnu Mahadeva Iyer – IISc Bangalore
- Dr. Deepak Ronanki – IIT Madras
- Dr. Juan José Rodríguez-Andina – IEEE IES President (2026–2027)
- Dr. Milos Manic – IEEE IES President (2024–2025)

Participation Summary

Total Participants: **89**

- Industry Professionals: 24
- Faculty Members: 4
- Students & Young Professionals: 61

Organizers & Coordinators

Report Prepared By:

Dr. Tripura Pidikiti – Hyderabad Hub Leader, IEEE IES Hubs & Nodes Initiative

Dr. Deepak Ronaki – Assistant Professor, IIT Madras

Mr. Anakapalli Vasu Deva – Research Scholar, IIT Madras

The workshop successfully strengthened collaboration between academia and industry while promoting advanced knowledge in EV battery and charging technologies.
